DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 12-14 are drawn to a composition comprising a naphthoquinone derivative of formula 1, classified in class 514, subclass 682.
- II. Claims 15-17 are drawn to a method of preparing a medicament for use in treating and/or controlling tuberculosis with naphthoquinone derivatives of formula 1, classified in class 514, subclasses 682 and 924.
- III. Claims 18-21 are drawn to a method of treating and/or controlling tuberculosis caused by *Mycobacterium tuberculosis* with a naphthoquinone derivative of formula 1, classified in class 514, subclass 682 and 924.

The three inventions are independent and distinct, each from the other as they have acquired a separate status in the art as shown by their separate subject matter for inventive effort. Further, a reference which anticipates any one of the above inventions would neither anticipate or make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.

The applicants are required to elect a single invention for examination purposes.
